

Each of the company founders has over 30 years of experience in precision measurement of air flow, pressure and dew point as well as in compressed air applications. This experience together with a young and dynamic research & development team provides the right solutions to our customers.

Our company was founded in Germany in 1992 as a small compressed air service company. The founder Christian Schuldt started to sell measurement instruments for compressed air applications. The growing business leads to the restructure of the company and CS Messtechnik started in 2002.

With our continued growth and worldwide demand for our product line we started the Asian operations in 2005. Located in Shenzhen, China our Asian operations provide engineering, marketing and sales support. Our Hong Kong warehouse allows for immediate shipment to all Asian customers.

CS Instruments has an extensive dealer network with full technical support for all of the varied applications that our customers demand. Those are among the leading companies of Europe, Asia, USA and South Africa. This unique link provides us the insight into our continuing technical innovation today and tomorrow.
